

## SPECIFICATION

### Glycolic Acid

| Parameters        | Specification                                                                                                         |
|-------------------|-----------------------------------------------------------------------------------------------------------------------|
| CAS Number        | 79-14-1                                                                                                               |
| Appearance        | White crystalline solid                                                                                               |
| Molecular Formula | C <sub>2</sub> H <sub>4</sub> O <sub>3</sub>                                                                          |
| Molecular Weight  | 76.05 g/mol                                                                                                           |
| Boiling Point     | 100–101 °C                                                                                                            |
| Flash Point       | 135 °C                                                                                                                |
| Purity            | 96-98%                                                                                                                |
| Refractive Index  | 1.43                                                                                                                  |
| Solubility        | Highly soluble in water, alcohols, acetone                                                                            |
| Uses              | Widely used in cosmetics (chemical peels, exfoliants), textile finishing, leather processing, and industrial cleaning |
