

## SPECIFICATION

### Acid Thickener

| Parameters       | Specification                                                                 |
|------------------|-------------------------------------------------------------------------------|
| Appearance       | Colorless viscous liquid                                                      |
| Molecular Weight | 90000 g/mol                                                                   |
| Boiling Point    | 190 °C                                                                        |
| Flash Point      | 120 °C                                                                        |
| Purity           | 98–99%                                                                        |
| Refractive Index | 1.470                                                                         |
| Solubility       | Soluble in water                                                              |
| Uses             | Thickening agent for acidic formulations; used in paints, coatings, cosmetics |
