

## SPECIFICATION

### Butyl Stearate

| Parameters        | Specification                                                               |
|-------------------|-----------------------------------------------------------------------------|
| CAS Number        | 123-95-5                                                                    |
| Appearance        | Clear, oily liquid                                                          |
| Molecular Formula | C <sub>22</sub> H <sub>44</sub> O <sub>2</sub>                              |
| Molecular Weight  | 340.59 g/mol                                                                |
| Boiling Point     | 215–220 °C                                                                  |
| Flash Point       | >110 °C                                                                     |
| Purity            | 96-98%                                                                      |
| Refractive Index  | 1.44–1.45                                                                   |
| Solubility        | Insoluble in water; soluble in organic solvents (ethanol, ether, oils)      |
| Uses              | Emollient in cosmetics; plasticizer in polymers; lubricant; defoaming agent |
