

## SPECIFICATION

### Kojic Acid Dipalmitate

| Parameters        | Specification                                                                      |
|-------------------|------------------------------------------------------------------------------------|
| CAS Number        | 79725-98-7                                                                         |
| Appearance        | White to off-white crystalline powder                                              |
| Molecular Formula | C38H66O6                                                                           |
| Molecular Weight  | 618.99 g/mol                                                                       |
| Flash Point       | >150 °C                                                                            |
| Purity            | 96-98%                                                                             |
| Solubility        | Insoluble in water; soluble in oils, esters, and cosmetic solvents                 |
| Uses              | Skin-lightening agent; inhibits melanin formation; used in creams, lotions, serums |
