

## SPECIFICATION

### Glyceryl Oleate

| Parameters        | Specification                                                                             |
|-------------------|-------------------------------------------------------------------------------------------|
| CAS Number        | 25496-72-4                                                                                |
| Appearance        | Clear to pale yellow viscous liquid                                                       |
| Molecular Formula | C <sub>21</sub> H <sub>40</sub> O <sub>4</sub>                                            |
| Molecular Weight  | 356.55 g/mol                                                                              |
| Boiling Point     | >200 °C                                                                                   |
| Flash Point       | >110 °C                                                                                   |
| Purity            | 93-95%                                                                                    |
| Refractive Index  | 1.47–1.48                                                                                 |
| Solubility        | Insoluble in water; soluble in ethanol, chloroform, oils                                  |
| Uses              | Emulsifier in cosmetics and food; skin-conditioning agent; stabilizer in pharmaceuticals; |
