

## SPECIFICATION

### Palmera A5608

| Parameters       | Specification                                                     |
|------------------|-------------------------------------------------------------------|
| Appearance       | Colorless liquid                                                  |
| Molecular Weight | 312.45 g/mol                                                      |
| Boiling Point    | 120 °C                                                            |
| Flash Point      | 60 °C                                                             |
| Purity           | 98–99%                                                            |
| Refractive Index | 1.460                                                             |
| Solubility       | Soluble in most organic solvents;<br>sparingly soluble in water   |
| Uses             | Fragrance component; solvent;<br>performance additive in coatings |
