

## SPECIFICATION

### Polyquaternium-7

| Parameters       | Specification                                                                                                                              |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| CAS Number       | 26590-05-06                                                                                                                                |
| Appearance       | Colorless to pale yellow viscous liquid                                                                                                    |
| Molecular Weight | 70000 g/mol                                                                                                                                |
| Boiling Point    | 260 °C                                                                                                                                     |
| Flash Point      | 230 °C                                                                                                                                     |
| Purity           | 99-99.9%                                                                                                                                   |
| Refractive Index | 1.46                                                                                                                                       |
| Solubility       | Water-soluble                                                                                                                              |
| Uses             | Used as a conditioning polymer and thickener in cosmetic formulations, particularly in shampoos, conditioners, and personal care products. |
