

## SPECIFICATION

### Lauramine Oxide

| Parameters        | Specification                                                                         |
|-------------------|---------------------------------------------------------------------------------------|
| CAS Number        | 1643-20-5                                                                             |
| Appearance        | Clear to pale yellow liquid                                                           |
| Molecular Formula | C <sub>14</sub> H <sub>31</sub> NO                                                    |
| Molecular Weight  | 229.41 g/mol                                                                          |
| Boiling Point     | >200 °C                                                                               |
| Flash Point       | 93–95 °C                                                                              |
| Purity            | 93-95%                                                                                |
| Refractive Index  | 1.46–1.47                                                                             |
| Solubility        | Freely soluble in water; soluble in ethanol and other polar solvents                  |
| Uses              | Foam booster and stabilizer in shampoos, detergents, dishwashing liquids; emulsifier; |
