

## SPECIFICATION

### Nonylphenol Ethoxylate 9.5 Mole

| Parameters       | Specification                                                                       |
|------------------|-------------------------------------------------------------------------------------|
| Appearance       | Colorless to pale yellow liquid                                                     |
| Molecular Weight | 639 g/mol                                                                           |
| Boiling Point    | 300 °C                                                                              |
| Flash Point      | 200 °C                                                                              |
| Purity           | 98–99%                                                                              |
| Refractive Index | 1.46                                                                                |
| Solubility       | Soluble in water                                                                    |
| Uses             | Industrial surfactant used in cleaners, detergents, emulsions, paints, and coatings |
