

## SPECIFICATION

### Squalane

| Parameters        | Specification                                                                           |
|-------------------|-----------------------------------------------------------------------------------------|
| CAS Number        | 0111-01-03                                                                              |
| Appearance        | Colorless liquid                                                                        |
| Molecular Formula | C <sub>30</sub> H <sub>62</sub>                                                         |
| Molecular Weight  | 422.83 g/mol                                                                            |
| Boiling Point     | 350 °C                                                                                  |
| Flash Point       | 230 °C                                                                                  |
| Purity            | 98-99%                                                                                  |
| Refractive Index  | 1.462                                                                                   |
| Solubility        | Insoluble in water; soluble in non-polar organic solvents                               |
| Uses              | Cosmetics emollient; skin conditioning agent; industrial lubricant; polymer plasticizer |
