

## SPECIFICATION

### Natural Karanj Oil

| Parameters       | Specification                                                                                              |
|------------------|------------------------------------------------------------------------------------------------------------|
| Appearance       | Golden yellow to amber liquid                                                                              |
| Molecular Weight | 860.0 g/mol                                                                                                |
| Boiling Point    | 320 °C                                                                                                     |
| Flash Point      | 230 °C                                                                                                     |
| Purity           | 98–99%                                                                                                     |
| Refractive Index | 1.462                                                                                                      |
| Solubility       | Insoluble in water; soluble in non-polar solvents                                                          |
| Uses             | Biofuel feedstock; lubricant; soap-making; cosmetic ingredient; biodiesel production; traditional medicine |
