

## SPECIFICATION

### Diocetyl Adipate

| Parameters        | Specification                                                     |
|-------------------|-------------------------------------------------------------------|
| CAS Number        | 123-79-5                                                          |
| Appearance        | Colorless liquid                                                  |
| Molecular Formula | C22H42O4                                                          |
| Molecular Weight  | 370.57 g/mol                                                      |
| Boiling Point     | 360 °C                                                            |
| Flash Point       | 180 °C                                                            |
| Purity            | 98–99%                                                            |
| Refractive Index  | 1.435                                                             |
| Solubility        | Insoluble in water; soluble in organic solvents                   |
| Uses              | Plasticizer for PVC and other polymers; used in coatings and inks |
