

## SPECIFICATION

### Dibutyl Adipate

| Parameters        | Specification                                                               |
|-------------------|-----------------------------------------------------------------------------|
| CAS Number        | 105-99-7                                                                    |
| Appearance        | Colorless to pale yellow liquid                                             |
| Molecular Formula | C <sub>14</sub> H <sub>26</sub> O <sub>4</sub>                              |
| Molecular Weight  | 258.34 g/mol                                                                |
| Boiling Point     | 324 °C                                                                      |
| Flash Point       | 176 °C                                                                      |
| Purity            | 98–99%                                                                      |
| Refractive Index  | 1.462                                                                       |
| Solubility        | Slightly soluble in water; soluble in most organic solvents                 |
| Uses              | Plasticizer for PVC and other polymers; coatings; inks; cosmetic ingredient |
