

## SPECIFICATION

### 2-(2-Ethoxyethoxy)Ethyl Acrylate

| Parameters        | Specification                                                 |
|-------------------|---------------------------------------------------------------|
| CAS Number        | 7328-17-8                                                     |
| Appearance        | Colorless liquid                                              |
| Molecular Formula | C <sub>9</sub> H <sub>16</sub> O <sub>4</sub>                 |
| Molecular Weight  | 275.28 g/mol                                                  |
| Boiling Point     | 168 °C                                                        |
| Flash Point       | -5 °C                                                         |
| Purity            | 98–99%                                                        |
| Refractive Index  | 1.462                                                         |
| Solubility        | Soluble in most organic solvents;<br>immiscible with water    |
| Uses              | Monomer for UV-curable coatings,<br>adhesives, sealants, inks |
