

## SPECIFICATION

### Barium Peroxide

| Parameters        | Specification                                                             |
|-------------------|---------------------------------------------------------------------------|
| CAS Number        | 1304-29-6                                                                 |
| Appearance        | White crystalline solid                                                   |
| Molecular Formula | BaO <sub>2</sub>                                                          |
| Molecular Weight  | 169.33 g/mol                                                              |
| Boiling Point     | 400 °C                                                                    |
| Melting Point     | 360 °C                                                                    |
| Flash Point       | 180 °C                                                                    |
| Purity            | 98–99%                                                                    |
| Refractive Index  | 1.6                                                                       |
| Solubility        | Slightly soluble in water                                                 |
| Uses              | Oxygen source and oxidizing agent for chemical synthesis and pyrotechnics |
