

## SPECIFICATION

### Para Toluenesulphonic Acid Anhydrous

| Parameters       | Specification                                                                 |
|------------------|-------------------------------------------------------------------------------|
| CAS Number       | 104-15-4                                                                      |
| Appearance       | White crystalline solid                                                       |
| Molecular Weight | 172.20 g/mol                                                                  |
| Boiling Point    | 260 °C                                                                        |
| Melting Point    | 97 °C                                                                         |
| Flash Point      | 230 °C                                                                        |
| Purity           | 98–99%                                                                        |
| Refractive Index | 1.58                                                                          |
| Solubility       | Soluble in water and organic solvents such as acetone                         |
| Uses             | Catalyst in esterifications and acylations; intermediate in organic synthesis |
