

## SPECIFICATION

### EDTA Disodium Salt

| Parameters        | Specification                                                                                             |
|-------------------|-----------------------------------------------------------------------------------------------------------|
| CAS Number        | 6381-92-6                                                                                                 |
| Appearance        | White crystalline powder                                                                                  |
| Molecular Formula | C10H18N2Na2O10                                                                                            |
| Molecular Weight  | 336.206 g/mol                                                                                             |
| Boiling Point     | 240 °C                                                                                                    |
| Melting Point     | 250 °C                                                                                                    |
| Flash Point       | 300 °C                                                                                                    |
| Purity            | 99–99.5%                                                                                                  |
| Refractive Index  | 1.5                                                                                                       |
| Solubility        | Highly soluble in water; soluble in ethanol; insoluble in nonpolar solvents                               |
| Uses              | Chelating agent; stabilizer; used in analytical chemistry, biology, cosmetics and industrial applications |
