

## SPECIFICATION

### Epichlorohydrin

| Parameters        | Specification                                                                                       |
|-------------------|-----------------------------------------------------------------------------------------------------|
| CAS Number        | 106-89-8                                                                                            |
| Appearance        | Colorless liquid                                                                                    |
| Molecular Formula | C <sub>3</sub> H <sub>5</sub> ClO                                                                   |
| Molecular Weight  | 92.53 g/mol                                                                                         |
| Boiling Point     | 114 °C                                                                                              |
| Melting Point     | -40 °C                                                                                              |
| Flash Point       | -7 °C                                                                                               |
| Purity            | 99-99.5%                                                                                            |
| Refractive Index  | 1.437                                                                                               |
| Solubility        | Miscible with water; soluble in many organic solvents                                               |
| Uses              | Intermediary in epoxy resins and glycidyl ethers; production of surfactants and specialty chemicals |
