

## SPECIFICATION

### Tributyl Phosphate

| Parameters        | Specification                                                                                      |
|-------------------|----------------------------------------------------------------------------------------------------|
| CAS Number        | 126-73-8                                                                                           |
| Appearance        | Colorless liquid                                                                                   |
| Molecular Formula | C <sub>12</sub> H <sub>27</sub> O <sub>4</sub> P                                                   |
| Molecular Weight  | 266.32 g/mol                                                                                       |
| Boiling Point     | 280 °C                                                                                             |
| Melting Point     | -5 °C                                                                                              |
| Flash Point       | 145 °C                                                                                             |
| Purity            | 98–99%                                                                                             |
| Refractive Index  | 1.435                                                                                              |
| Solubility        | Insoluble in water; soluble in nonpolar organic solvents                                           |
| Uses              | Solvent/extractive agent for metal ions in nuclear fuel reprocessing; solvent in organic synthesis |
