

## SPECIFICATION

### Zinc Chromate

| Parameters        | Specification                                                                                |
|-------------------|----------------------------------------------------------------------------------------------|
| CAS Number        | 13530-65-9                                                                                   |
| Appearance        | Bright yellow powder                                                                         |
| Molecular Formula | ZnCrO <sub>4</sub>                                                                           |
| Molecular Weight  | 181.38 g/mol                                                                                 |
| Boiling Point     | 1000 °C                                                                                      |
| Melting Point     | 680 °C                                                                                       |
| Flash Point       | 600 °C                                                                                       |
| Purity            | 98–99%                                                                                       |
| Refractive Index  | 1.89                                                                                         |
| Solubility        | Practically insoluble in water;<br>soluble in acids                                          |
| Uses              | Pigment and corrosion-inhibiting<br>pigment for coatings; anti-<br>corrosion primer additive |
