

## SPECIFICATION

### 2-Amino-2-Methyl-1-Propanol

| Parameters        | Specification                                                                                                 |
|-------------------|---------------------------------------------------------------------------------------------------------------|
| CAS Number        | 124-68-5                                                                                                      |
| Appearance        | Colorless liquid                                                                                              |
| Molecular Formula | C <sub>4</sub> H <sub>11</sub> NO                                                                             |
| Molecular Weight  | 89.14 g/mol                                                                                                   |
| Boiling Point     | 210 °C                                                                                                        |
| Melting Point     | -21 °C                                                                                                        |
| Flash Point       | 110 °C                                                                                                        |
| Purity            | 98–99%                                                                                                        |
| Refractive Index  | 1.458                                                                                                         |
| Solubility        | Soluble in water; soluble in most organic solvents                                                            |
| Uses              | Chemical intermediate in the production of surfactants, polymers, cosmetics, and pharmaceutical intermediates |
