

## SPECIFICATION

### Trixylenyl Phosphate

| Parameters        | Specification                                                     |
|-------------------|-------------------------------------------------------------------|
| CAS Number        | 25155-23-1                                                        |
| Appearance        | Colorless to pale yellow liquid                                   |
| Molecular Formula | C <sub>24</sub> H <sub>27</sub> O <sub>4</sub> P                  |
| Molecular Weight  | 388.43 g/mol                                                      |
| Boiling Point     | 320 °C                                                            |
| Melting Point     | -5 °C                                                             |
| Flash Point       | 170 °C                                                            |
| Purity            | 98–99%                                                            |
| Refractive Index  | 1.59                                                              |
| Solubility        | Soluble in aromatic hydrocarbons;<br>insoluble in water           |
| Uses              | Flame retardant additive for<br>plastics, coatings, and adhesives |
