

## SPECIFICATION

### 2,2-Bis Hydroxymethy Propionic Acid

| Parameters       | Specification                                                            |
|------------------|--------------------------------------------------------------------------|
| CAS Number       | 1047217                                                                  |
| Appearance       | White crystalline solid                                                  |
| Molecular Weight | 134.13 g/mol                                                             |
| Boiling Point    | 230 °C                                                                   |
| Melting Point    | 60 °C                                                                    |
| Flash Point      | 210 °C                                                                   |
| Purity           | 98–99%                                                                   |
| Refractive Index | 1.462                                                                    |
| Solubility       | Soluble in water; soluble in methanol                                    |
| Uses             | Monomer for polymer synthesis; building block for biodegradable polymers |
