

## SPECIFICATION

### 1,1,2,2-Tetrachloroethane

| Parameters        | Specification                                                                  |
|-------------------|--------------------------------------------------------------------------------|
| CAS Number        | 79-34-5                                                                        |
| Appearance        | Colorless liquid                                                               |
| Molecular Formula | C <sub>2</sub> H <sub>2</sub> Cl <sub>4</sub>                                  |
| Molecular Weight  | 167.87 g/mol                                                                   |
| Boiling Point     | 168 °C                                                                         |
| Melting Point     | -40 °C                                                                         |
| Flash Point       | 65 °C                                                                          |
| Purity            | 98–99%                                                                         |
| Refractive Index  | 1.5                                                                            |
| Solubility        | Slightly soluble in water; soluble in acetone and diethyl ether                |
| Uses              | Industrial solvent; intermediate in organochlorine synthesis; degreasing agent |
