

## SPECIFICATION

### Wacker L097

| Parameters       | Specification                                                |
|------------------|--------------------------------------------------------------|
| Appearance       | Colorless to pale yellow liquid                              |
| Molecular Weight | 178.50 g/mol                                                 |
| Boiling Point    | 210 °C                                                       |
| Melting Point    | -20 °C                                                       |
| Flash Point      | 68 °C                                                        |
| Purity           | 98–99%                                                       |
| Refractive Index | 1.462                                                        |
| Solubility       | Soluble in most organic solvents;<br>immiscible with water   |
| Uses             | Industrial solvent; processing aid;<br>chemical intermediate |
