

## SPECIFICATION

### Strychnine Sulphate

| Parameters        | Specification                                                                         |
|-------------------|---------------------------------------------------------------------------------------|
| CAS Number        | 60-41-3                                                                               |
| Appearance        | White crystalline solid                                                               |
| Molecular Formula | C <sub>42</sub> H <sub>46</sub> N <sub>4</sub> O <sub>8</sub> S                       |
| Molecular Weight  | 432.50 g/mol                                                                          |
| Boiling Point     | 350 °C                                                                                |
| Melting Point     | 210 °C                                                                                |
| Flash Point       | 120 °C                                                                                |
| Purity            | 98–99%                                                                                |
| Refractive Index  | 1.62                                                                                  |
| Solubility        | Soluble in water; soluble in ethanol                                                  |
| Uses              | Historically used as a rodenticide and in pharmacological research; tightly regulated |
