

## SPECIFICATION

### Magnesium Hydroxide Ip

| Parameters       | Specification                                                                            |
|------------------|------------------------------------------------------------------------------------------|
| Appearance       | White to off-white powder                                                                |
| Molecular Weight | 58.32 g/mol                                                                              |
| Boiling Point    | 350 °C                                                                                   |
| Melting Point    | 350 °C                                                                                   |
| Flash Point      | 700 °C                                                                                   |
| Purity           | 98–99%                                                                                   |
| Refractive Index | 1.56                                                                                     |
| Solubility       | Sparingly soluble in water; 0.09 g per 100 mL at 20 °C                                   |
| Uses             | Antacid; flame retardant filler; filler in plastics and paper; environmental remediation |
