

## SPECIFICATION

### 2-Hydroxyethanesulfonic Acid Sodium Salt

| Parameters        | Specification                                                                  |
|-------------------|--------------------------------------------------------------------------------|
| CAS Number        | 1562-00-1                                                                      |
| Appearance        | White crystalline powder                                                       |
| Molecular Formula | C <sub>2</sub> H <sub>5</sub> NaO <sub>4</sub> S                               |
| Molecular Weight  | 148.11 g/mol                                                                   |
| Boiling Point     | 320 °C                                                                         |
| Melting Point     | 170 °C                                                                         |
| Flash Point       | 230 °C                                                                         |
| Purity            | 98–99%                                                                         |
| Refractive Index  | 1.5                                                                            |
| Solubility        | Soluble in water                                                               |
| Uses              | Mild surfactant and humectant used in cosmetics and personal care formulations |
