

## SPECIFICATION

### Hexamethyldisiloxane

| Parameters        | Specification                                                          |
|-------------------|------------------------------------------------------------------------|
| CAS Number        | 107-46-0                                                               |
| Appearance        | Colorless liquid                                                       |
| Molecular Formula | C <sub>6</sub> H <sub>18</sub> OSi <sub>2</sub>                        |
| Molecular Weight  | 162.386 g/mol                                                          |
| Boiling Point     | 101 °C                                                                 |
| Melting Point     | -60 °C                                                                 |
| Flash Point       | -40 °C                                                                 |
| Purity            | 98–99%                                                                 |
| Refractive Index  | 1.39                                                                   |
| Solubility        | Insoluble in water; soluble in organic solvents                        |
| Uses              | Silylation reagent; precursor to siloxane polymers; moisture scavenger |
