

## SPECIFICATION

### 2-Fluorotoluene

| Parameters        | Specification                                  |
|-------------------|------------------------------------------------|
| CAS Number        | 95-52-3                                        |
| Appearance        | Colorless liquid                               |
| Molecular Formula | C <sub>7</sub> H <sub>7</sub> F                |
| Molecular Weight  | 110.13 g/mol                                   |
| Boiling Point     | 145.0 °C                                       |
| Melting Point     | -30.0 °C                                       |
| Flash Point       | -4.0 °C                                        |
| Purity            | 98–99%                                         |
| Refractive Index  | 1.503                                          |
| Solubility        | Sparingly soluble in water                     |
| Uses              | Solvent and intermediate in chemical synthesis |
