

## SPECIFICATION

### 2-Methylquinoline

| Parameters        | Specification                                                  |
|-------------------|----------------------------------------------------------------|
| CAS Number        | 91-63-4                                                        |
| Appearance        | Colorless to pale yellow liquid                                |
| Molecular Formula | C <sub>10</sub> H <sub>9</sub> N                               |
| Molecular Weight  | 143.19 g/mol                                                   |
| Boiling Point     | 260 °C                                                         |
| Melting Point     | -2 °C                                                          |
| Flash Point       | 78 °C                                                          |
| Purity            | 98–99%                                                         |
| Refractive Index  | 1.59                                                           |
| Solubility        | Soluble in organic solvents,<br>insoluble in water             |
| Uses              | Used as an intermediate in<br>pharmaceutical and dye synthesis |
