

SPECIFICATION

Aluminium Ammonium Sulfate AR

Parameters	Specification
Appearance	White crystalline powder
Molecular Weight	453.33 g/mol
Boiling Point	190 °C
Melting Point	92 °C
Flash Point	Not flammable
Purity	99.0–99.9%
Refractive Index	1.490
Solubility	Soluble in water
Uses	Coagulant for water treatment, mordant in dyeing, paper and textile applications
