

## SPECIFICATION

### Aluminium Phosphide 56%

| Parameters       | Specification                         |
|------------------|---------------------------------------|
| Appearance       | White to grayish solid                |
| Molecular Weight | 57.95 g/mol                           |
| Boiling Point    | 1000 °C                               |
| Melting Point    | 980 °C                                |
| Purity           | 56–56%                                |
| Solubility       | Insoluble in water                    |
| Uses             | Fumigant for stored grains, pesticide |
