

## SPECIFICATION

### Ammonium Alum Lumps

| Parameters        | Specification                                                                                               |
|-------------------|-------------------------------------------------------------------------------------------------------------|
| Appearance        | White crystalline lumps                                                                                     |
| Molecular Formula | AlH <sub>4</sub> NO <sub>8</sub> S <sub>2</sub>                                                             |
| Molecular Weight  | 453.34 g/mol                                                                                                |
| Boiling Point     | 190 °C                                                                                                      |
| Melting Point     | 92 °C                                                                                                       |
| Flash Point       | 199 °C                                                                                                      |
| Purity            | 98–99%                                                                                                      |
| Refractive Index  | 1.52                                                                                                        |
| Solubility        | Soluble in water                                                                                            |
| Uses              | Water treatment coagulant; textile mordant; deodorant ingredient; miscellaneous uses in paper and cosmetics |
