

## SPECIFICATION

### Cis-3-Hexenyl Oxyacetaldehyde

| Parameters        | Specification                                              |
|-------------------|------------------------------------------------------------|
| CAS Number        | 68133-72-2                                                 |
| Appearance        | Colorless to pale yellow liquid                            |
| Molecular Formula | C <sub>8</sub> H <sub>14</sub> O <sub>2</sub>              |
| Molecular Weight  | 162.22 g/mol                                               |
| Boiling Point     | 190 °C                                                     |
| Melting Point     | -40 °C                                                     |
| Flash Point       | 74 °C                                                      |
| Purity            | 98–99%                                                     |
| Refractive Index  | 1.431                                                      |
| Solubility        | Soluble in ethanol; sparingly soluble in water             |
| Uses              | Fragrance ingredient; intermediate for fragrance synthesis |
