

## SPECIFICATION

### Clove Bud Oil

| Parameters        | Specification                                             |
|-------------------|-----------------------------------------------------------|
| Appearance        | Clear to yellow amber liquid                              |
| Molecular Formula | C10H12O2                                                  |
| Molecular Weight  | 164.20 g/mol                                              |
| Boiling Point     | 250°C                                                     |
| Flash Point       | 110°C                                                     |
| Purity            | ≥ 85%                                                     |
| Refractive Index  | 1.530 - 1.560                                             |
| Solubility        | Soluble in alcohol and oils;<br>insoluble in water        |
| Uses              | Flavoring agent, Fragrance in<br>cosmetics, Antimicrobial |
