

SPECIFICATION

Coal Fine Sodium Sulphate Anhydrous

Parameters	Specification
Appearance	White crystalline powder
Molecular Weight	142.04 g/mol
Boiling Point	1689 °C
Melting Point	884 °C
Flash Point	No flash point
Purity	98–99%
Refractive Index	1.480
Solubility	19.5 g/100 g water at 25 °C
Uses	Detergents, glass manufacturing, paper production, coal processing, filler in various chemical processes
