

SPECIFICATION

Copper Sulphate Crystals

Parameters	Specification
Appearance	Blue crystals
Molecular Weight	249.68 g/mol
Boiling Point	650 °C
Melting Point	110 °C
Purity	99–99%
Refractive Index	1.473
Solubility	Very soluble in water
Uses	Used as a source of Cu^{2+} in electroplating, agriculture as fungicide and herbicide, laboratory reagent and in educational demonstrations.
