

## SPECIFICATION

### EDTA Disodium

| Parameters       | Specification                            |
|------------------|------------------------------------------|
| Appearance       | White powder                             |
| Molecular Weight | 336.206 g/mol                            |
| Boiling Point    | 360 °C                                   |
| Melting Point    | 240 °C                                   |
| Flash Point      | 210 °C                                   |
| Purity           | 98–99%                                   |
| Refractive Index | 1.462                                    |
| Solubility       | Soluble in water                         |
| Uses             | Chelating agent; stabilizer; sequestrant |
