

SPECIFICATION

EDTA Tetrasodium Powder

Parameters	Specification
Appearance	White to off-white crystalline powder
Molecular Weight	380.17 g/mol
Boiling Point	300 °C
Melting Point	240 °C
Flash Point	200 °C
Purity	98–99%
Solubility	Soluble in water, slightly soluble in methanol
Uses	Chelating agent, stabilizer and buffering agent, complexing agent in analytical chemistry and biology
