SPECIFICATION

Ellagic Acid 40%

Parameters	Specification
Appearance	Dark brown to reddish-brown powder
Molecular Weight	302.19 g/mol
Boiling Point	360 °C
Melting Point	350 °C
Flash Point	190 °C
Purity	40–40%
Solubility	Sparingly soluble in water; soluble in DMSO and ethanol
Uses	Antioxidant; used as dietary supplement component; for biochemical research
