

## SPECIFICATION

### Humalite

| Parameters       | Specification                                                      |
|------------------|--------------------------------------------------------------------|
| Appearance       | Dark brown to black powder                                         |
| Molecular Weight | 2500 g/mol                                                         |
| Boiling Point    | 350 °C                                                             |
| Melting Point    | 120 °C                                                             |
| Flash Point      | 250 °C                                                             |
| Purity           | 98–99%                                                             |
| Refractive Index | 1.52                                                               |
| Solubility       | Insoluble in water at neutral pH;<br>soluble in alkaline solutions |
| Uses             | Soil conditioner; fertilizer additive;<br>chelating agent          |
