

SPECIFICATION

Lead Chloride

Parameters	Specification
CAS Number	7758-95-4
Appearance	White crystalline powder
Molecular Formula	Cl ₂ Pb
Molecular Weight	278.10 g/mol
Boiling Point	1414 °C
Melting Point	318 °C
Purity	99–99.5%
Refractive Index	1.74
Solubility	0.14 g/100 mL
Uses	Used as a precursor for lead compounds, pigment and ceramic applications, catalyst and material synthesis
