

## SPECIFICATION

### Lead Octate 24%

| Parameters       | Specification                                                      |
|------------------|--------------------------------------------------------------------|
| Appearance       | Dark brown liquid                                                  |
| Molecular Weight | 493.62 g/mol                                                       |
| Boiling Point    | 350 °C                                                             |
| Melting Point    | 100 °C                                                             |
| Flash Point      | 170 °C                                                             |
| Purity           | 24–24%                                                             |
| Refractive Index | 1.46                                                               |
| Solubility       | Insoluble in water, soluble in organic solvents                    |
| Uses             | Stabilizer for polymers and lubricants, catalyst in polymerization |
