

SPECIFICATION

Lithium Granules

Parameters	Specification
Appearance	Silvery-white metallic granules
Molecular Weight	6.94 g/mol
Boiling Point	1342 °C
Melting Point	180.54 °C
Purity	99.9–99.99%
Solubility	Insoluble in water, reacts with water
Uses	Used as a reducing agent in organic synthesis, alloying element in metal production, precursor to lithium compounds, battery materials
