

## SPECIFICATION

### Nagar Motha Oil

| Parameters       | Specification                                                           |
|------------------|-------------------------------------------------------------------------|
| Appearance       | Yellow to pale yellow oily liquid                                       |
| Molecular Weight | 600.0 g/mol                                                             |
| Boiling Point    | 198 °C                                                                  |
| Melting Point    | -10 °C                                                                  |
| Flash Point      | 185 °C                                                                  |
| Purity           | 98–99%                                                                  |
| Refractive Index | 1.472                                                                   |
| Solubility       | Insoluble in water; soluble in ethanol, methanol, chloroform, and ether |
| Uses             | Flavoring agent; traditional medicine; cosmetic ingredient              |
