

## SPECIFICATION

### Organic Vetivert Oil

| Parameters       | Specification                                                   |
|------------------|-----------------------------------------------------------------|
| Appearance       | Yellow to amber-yellow oily liquid                              |
| Molecular Weight | 218.36 g/mol                                                    |
| Boiling Point    | 250 °C                                                          |
| Melting Point    | -15 °C                                                          |
| Flash Point      | 68 °C                                                           |
| Purity           | 98–99%                                                          |
| Refractive Index | 1.52                                                            |
| Solubility       | Immiscible with water; soluble in organic solvents              |
| Uses             | Fragrance ingredient; perfumery; aromatherapy; flavor component |
