

## SPECIFICATION

### Pentaerythritol triacrylate

| Parameters        | Specification                                            |
|-------------------|----------------------------------------------------------|
| CAS Number        | 3524-68-3                                                |
| Appearance        | Colorless liquid                                         |
| Molecular Formula | C <sub>14</sub> H <sub>18</sub> O <sub>7</sub>           |
| Molecular Weight  | 332.0 g/mol                                              |
| Boiling Point     | 270 °C                                                   |
| Melting Point     | -20 °C                                                   |
| Flash Point       | 105 °C                                                   |
| Purity            | 98–99%                                                   |
| Refractive Index  | 1.5                                                      |
| Solubility        | Insoluble in water; soluble in acetone and ethyl acetate |
| Uses              | Monomer for UV-curable coatings and inks                 |
