

SPECIFICATION

Phosphoric Acid 70%

Parameters	Specification
Appearance	Colorless liquid
Molecular Weight	97.99 g/mol
Boiling Point	158 °C
Melting Point	42.35 °C
Purity	70–70%
Refractive Index	1.465
Solubility	Miscible with water
Uses	Industrial uses include pH control, rust removal, fertilizer production, used as an acid catalyst in chemical synthesis.
