

## SPECIFICATION

### Sepiplus 400

| Parameters       | Specification                                                          |
|------------------|------------------------------------------------------------------------|
| Appearance       | Colorless to pale yellow liquid                                        |
| Molecular Weight | 402.50 g/mol                                                           |
| Boiling Point    | 210 °C                                                                 |
| Melting Point    | -20 °C                                                                 |
| Flash Point      | 75 °C                                                                  |
| Purity           | 98–99%                                                                 |
| Refractive Index | 1.467                                                                  |
| Solubility       | Soluble in most organic solvents;<br>insoluble in water                |
| Uses             | Industrial solvent; plasticizer;<br>intermediate in chemical synthesis |
